Dear Scholarship Committee:

It gives me great pleasure to recommend Tyler Malovrh to your scholarship program. I have known Tyler for one year and his performance is outstanding in the classes where I've served as his instructor. So far, Tyler has successfully completed the iOS I and iOS II development courses and plans to take iOS III which will begin next week. These courses allow Tyler to have creative flexibility while learning mobile application development, specific to Apple devices. He has frequently implemented his interests in labs and assignments to bring a unique perspective to the work he accomplishes. He creates a classroom environment that opens up camaraderie as he works well with peers and is not afraid to assist others.

As part of the iOS series of courses, Tyler is building a skill set that can be applied to his future studies and career. Some of the overarching goals are:

- Planning a documented design that meets user requirements
- Troubleshooting problems through testing and debugging
- Secure software development through data validation
- Collaborating with peers and providing feedback in a professional manner
- Utilizing industry best practices to help develop solutions

I feel that Tyler would be a formidable recipient of your scholarship as he will continue to bring his passion for software development to your institution. I admire Tyler's passion for not just the content, but for the devices and frequently keeps me informed of new industry developments. If there are any questions regarding Tyler's performance in class, please feel free to e-mail me at moconnor28@lakelandcc.edu.

Sincerely,

Melinda O'Connor
IT & CS Adjunct Faculty
